### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1,3-10,12-16 and 27-35 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Franchere et al.

See the appropriate paragraph of the 11/23/05 Office action.

With respect to the newly added limitations, they appear to contain new matter and have not been further considered.

***Response to Arguments***

Applicant's arguments filed 10/23/06 have been fully considered but they are not persuasive.

Applicants' correctly state the instant claims require the plurality of sample well to be connected in a linear array. Applicant's state Franchere et al. teaches modular units that cannot be read on the instant claims. The Office maintains the instant claim language "sample well" is sufficiently broad to be properly read on Franchere et al.

Applicant's state if Franchere et al. are considered without test tubes it could not hold fluid and could not be read on the instant claims. This is not convincing because Franchere et al. positively teaches test tubes, as acknowledged by Applicants.

Applicants state even if the test tubes taught by Franchere et al. were considered "wells", the art is deficient because the tubes are not "physically connected" to each other. The Office maintains the instant language is sufficiently broad the tubes taught

by Franchere et al. are physically connected to each other via the modular units that hold the tubes.

Applicants argue Franchere et al. teaches away from permanent connection or integral construction. These remarks are not commensurate in scope with the pending claims because those limitations have been deleted.

With respect to new claim 35, Applicants state Franchere et al. teaches modular units with perforate sides and cannot be read on the instant invention. The Office maintains Franchere et al. teaches test tubes which have been properly read on claim 35. The language of claim 35 is open (e.g. comprising) and does not exclude additional structures.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
